To whom it might concern.

Seattle 08/29/03

Glacier Fish Company has two factory trawlers and two long liners operating in Alaska, we started using Pacific Pipe and Pump during a US\$ 6mill conversion of our long liner Glacier Bay, Pacific Pipe and Pump was contracted to replace most of the old fresh water lines onboard, install new saltwater line for the factory. All the replacement and new installation was done in Geberit pipe.

We have also started to use Pacific Pipe and Pump on rest of our fleet when we are replacing old freshwater and sea water lines or when have any new piping to install.

We have been extremely satisfied with the work performance they have done for us, and with their vision of using/introducing new product like Geberit it has saved us a lot of money as well as we have got a more reliable pipe product installed.

I will highly recommend Pacific Pipe and Pump as a vendor.

Should there be any questions, please contact.
